

Turnkey Vegetable Growing System

The GroExx[®] Green Tunnel™ Growing system combines three elements that mean success from Day One: A sturdy Golden Pacific™ greenhouse structure; Delta T Solutions' highly efficient radiant heat system; and high-yield GardenSoxx[®] planters for productive vegetable growing. This system requires less input to produce more output — especially when compared to plastic pots or hydroponics.

Golden Pacific™ Structure — The Best Structure

- Economically priced
- Superior strength square tube design
- Tall peak heights
- Simple and easy to build
- Works with virtually any greenhouse accessory or environmental control

Delta T Solutions™ — The Most Efficient Heat

- Compatible with any hot water heat source
- Maximum soil and plant temperature control
- Maintains even temperatures throughout system
- Multiple temperature zones for flexible growing
- Simple to install flexible tubing for heat comes in 500' rolls
- Easily tie into plastic mainlines
- Install ridged spacers with minimal fasteners
- High quality tubing withstands UV light, fertilizers, and high temperatures

GardenSoxx[®] — The Most Productive Planters

- Tighter plant spacing
- Cooler soil temps — 20° cooler than soil systems
- Cannot be overwatered, minimizing disease
- Use less media than plastic pots
- Higher yield and higher sugar content of fruit
- No three-year waiting period for organic certification
- Machine rental available for easy filling
